Circular No.: 11/2024-25

Dated: 30.05.2024

There are times in our lives that make us reflect on the purpose of a task and we wonder about its significance in helping us in accomplishing something worthwhile. The beauty of this process is that it allows us to step back and focus on the bigger picture. Being deeply focussed on detail, we realise that by fine-tuning the small things, we can ensure that everything functions seamlessly, ultimately contributing to the larger objective: the attainment of success.

Consider this: what if your task at hand is like a new Lego set that you have decided to build all by yourself. How will you approach the task? Presumably, you will first pull out all the individual pieces and group them according to the requirements of your building process. Finally, you will start from the easier set and move on to the more formidable ones, gradually as you proceed. But will you manage to successfully complete the task if you master making one part of the set blindfolded whereas you completely ignore the one you find a little challenging? Will you manage to create the complete picture while you disregard some aspects of your undertaking?

Similarly, consider the examination process as your Instruction Manual because it is instrumental in directing you to the what, why, where and how of your preparation process. Exams might seem arduous and daunting, but they are your road map to do well in the board examination. There is a reason for the constant chant of repetition, reiteration and reinforcement because nothing will ever be an acceptable substitute to these watch words.

So, to continue our collective journey of preparation for the challenging task ahead, we announce the upcoming **July Revisionary Examination**.
